Summary

Hello,

I am a computer engineer working as a full-stack developer.

://.

:

I am progressing with time and constantly restructuring myself to make more room for more knowledge and experiences that are going to aggregate my job.

Experience

Full-stack Developer

CI&T

Jan 2023 - Present (11 months)

Working with AngularJs and Java.

Android Software Developer Intern

CI&T

Dec 2021 - Jan 2023 (1 year 2 months)

I work with android apps, code maintenance, unit, and Component testing.

Java software developer intern

CI&T

Feb 2021 - Dec 2021 (11 months)

I worked with microservice architecture using Java Spring Boot, jenkins, Postman, Unit Tests, Rest Assured, Jira, IntelliJ and other technologies.

Sap Abap Developer Intern

Sigga Technologies

Aug 2019 - Jan 2021 (1 year 6 months)

I worked in the product and innovation team, responsible for the maintenance and improvements in the code of products integrated into SAP technology, specifically in the PM module (Plant Maintenance). We used the object-oriented language ABAP, Web Dynpro Framework, and SQL language.

Natural Gas Supervision and Control Technician

Companhia de Gas de Minas Gerais SA (GASMIG)

Sep 2009 - Aug 2016 (7 years)

Admitted via public tender, I took over as Operation and Maintenance Technician. Responsible for checking customer measurement systems and monitoring calibration at natural gas delivery points. I finished my cycle at the System Operations Center as a Supervision and Control technician, a sector where I worked with administrative control, monitoring the operation of the entire network of the state of Minas Gerais, responsible for the shift for risk and emergency management.

Electromechanical Technician

Gega Pecas E Servicos

Aug 2008 - Apr 2009 (9 months)

I worked in the manufacture and maintenance of machines.

I worked in several segments: dismantling, cleaning, painting, electrical and electronic maintenance, and connecting electric motors.

Mechanical Technician Intern

ArcelorMittal Brasil

Feb 2007 - Sep 2007 (8 months)

I worked in a sector in creation called: Maintenance Methods. The sector's logic was to outline reliability studies and best practices in the maintenance of the unit's assets.

Electromechanical technician Intern

Comau

Mar 2006 - Sep 2007 (1 year 7 months)

I worked on making manuals for machines that the sector produced, I had a lot of use of macros, advanced excel, and text translation.

Mechanical technician Intern

ArcelorMittal Brasil

Aug 2005 - Jan 2006 (6 months)

I worked in the production department: Trefilarias. I had contact with the SAP system, security standards, management, making spreadsheets and taught to think in a technical way.

Having the first contact with big machines.

Education

Centro Federal de Educação Tecnológica de Minas Gerais

Bachelor's degree in Computer Engineering , Computer Science

Jul 2015 - Dec 2022

The Computer Engineer will work in the design and development of computer hardware and software systems in software and electronics industries, telecommunications and industrial automation companies. Will provide consultancy in Information Technology both in financial institutions and in teaching and research institutions.

SENAI - Alvimar Carneiro de Resende

Associate degree in electronics, Electrical and Electronics Engineering

Feb 2015 - Jul 2016

Centro Federal de Educação Tecnológica de Minas Gerais

Associate degree in electromechanical

2006 - 2008

Senai Michels Michels

Associate degree in mechanics

2004 - 2006

The mechanics technician is a qualified professional who works in the installation and maintenance services of industrial machinery and equipment, coordinating work teams and assisting in the elaboration of projects and in the execution of drawings of industrial equipment and its components.

Provide services in the areas of machining and maintenance of machines and equipment.
